

MOHAMMAD AL-ZAGHAMEEM

Tafilah, Jordan | +962 799919621 | mohzag615@gmail.com | linkedin.com/in/mohammad-al-zaghameem

PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity graduate and experienced Teaching Assistant with a strong foundation in threat analysis, digital forensics, and network security. Proven hands-on training with the National Cybersecurity Center (NCSC) in critical infrastructure defense and incident response. Co-founder of the Jordan Cybersecurity Club, combining technical proficiency in Python and system administration with a passion for leadership and educational mentorship. Seeking a full-time position as a Junior SOC Analyst, Digital Forensics (DFIR) Analyst, or Junior Security Engineer.

EDUCATION

Tafila Technical University (TTU)

Expected August 2026

Bachelor of Science in Cybersecurity

Relevant Coursework: Infrastructure Security, Network Security, Operating Systems, Cryptography, Digital Forensics, Database Security.

PROFESSIONAL EXPERIENCE

Cybersecurity Trainee

2025

National Cybersecurity Center (NCSC) | Amman, Jordan

- Participated in intensive security operations training focused on critical national infrastructure (CNI) defense and incident response protocols.
- Acquired hands-on experience in threat hunting, real-time threat evaluation, vulnerability assessments, and mitigation.
- Monitored network traffic using enterprise security monitoring tools to detect and isolate anomalous Active Directory and endpoint footprints.

Undergraduate Teaching Assistant

2024 – 2026

Tafila Technical University | [Work Verification](#) | Tafila, Jordan

- Coordinated with engineering faculty to deliver technical laboratory exercises, classroom instruction, and objective grading rubrics.
- Facilitated hands-on experiments for core academic tracks including Operating Systems (Linux administration, process structures, shell automation), Artificial Intelligence, and Discrete Mathematics (cryptographic logic structures).
- Provided personalized technical troubleshooting and mentorship to over 100 students navigating complex network configurations.

Jordan Cybersecurity Club (JCC) Platform | Jordan

- Co-established a collaborative academic-to-industry bridging network to align university curricula with practical security sector skills.
- Organized and hosted community-driven digital literacy workshops, local Capture the Flag (CTF) events, and secure coding bootcamps.
- Developed curricula and taught specialized, hands-on courses on Python programming and the fundamentals of Cybersecurity.

TECHNICAL PROJECTS

Digital Forensics Insider Threat Investigation (FTK Imager & Autopsy)

- Conducted a mock threat investigation of a compromised endpoint to isolate evidence of data exfiltration by an insider.
- Acquired raw disk images using FTK Imager, analyzed system artifacts (Registry, Event Logs, Prefetch), and built an interactive incident timeline using Autopsy.

Secure E-Commerce Infrastructure Risk Analysis & Documentation

- Performed a comprehensive risk assessment of a simulated e-commerce web application, threat modeling attack vectors (OWASP Top 10).
- Designed security controls to mitigate risk, including secure network segmentation, Web Application Firewalls (WAF), and backup protocols.

EduKernel-Suite | [GitHub Link](#)

- Built a multi-image virtual cybersecurity laboratory designed for academic training and security exercises.
- Configured network virtualization and containerized environments to simulate multi-host attack and defense scenarios.

CERTIFICATIONS

- **Data Entry Certification** – Education for Employment in Jordan (EFE-Jordan)
- **Cybersecurity Fundamentals Certification** – Microsoft
- **Trainer of Trainers (ToT) Professional Certificate** – Technical & Vocational Skills Development Commission
- **Defensive Security & Threat Hunting Learning Paths** – TryHackMe

TECHNICAL SKILLS

Security & Forensics:	Digital Forensics (Autopsy, FTK Imager), Threat Hunting, Wireshark, Nmap, Kali Linux, Metasploit
Systems & Network:	TCP/IP, Network Security, Linux Administration (Ubuntu, Fedora, Manjaro), Windows Server
Programming & IoT:	Python, C++, Microelectronics Simulation (ESP32)
Soft Skills:	Technical Instruction, Curriculum Development, Public Speaking, Team Building
