MOHAMMAD AL-ZAGHAMIM

CYBERSECURITY GRADUATE | JUNIOR SOC ANALYST | DFIR ANALYST

Tafilah, Jordan | +962 799919621 | Email | LinkedIn | GitHub | **Portfolio**

PROFESSIONAL SUMMARY

Highly motivated Cybersecurity graduate from Tafila Technical University, Computer & Digital Skills Teacher, and experienced academic Teaching Assistant with a proven track record in threat analysis, digital forensics, and network security. Possesses hands-on training with the National Cybersecurity Center (NCSC) in critical infrastructure defense and incident response. Co-founder of the Jordan Cybersecurity Club (JCC) platform, combining technical proficiency in Python scripting, operating systems, and virtualization with an industry-validated Trainer of Trainers (ToT) certification. Seeking a full-time position as a Junior SOC Analyst, Digital Forensics (DFIR) Analyst, or Junior Security Engineer.

EDUCATION

Bachelor of Science in Cybersecurity **Graduated: Sep 2026**

Tafila Technical University (TTU) - Tafila, Jordan **Grade: Very Good (76.47%)** **[Degree Cert]**

Relevant Coursework: Infrastructure Security, Network Security, Operating Systems, Cryptography, Digital Forensics, Database Security

PROFESSIONAL EXPERIENCE

Computer & Digital Skills Teacher **August 2026 - Present**

Erweam Secondary School for Boys - Tafilah, Jordan

- Instruct and mentor students from 7th to 12th grade in digital skills, computer fundamentals, and IT literacy.
- Deliver structured curricula covering operating systems, basic programming logic, software tools, and cyber safety.
- Design and supervise practical computer lab sessions, evaluate student performance, and foster technical problem-solving.

Cybersecurity Trainee **2025**

National Cybersecurity Center (NCSC) - Amman, Jordan

- Participated in intensive cybersecurity training modules focused on Critical National Infrastructure (CNI) defense.
- Acquired practical experience in real-time threat evaluation, vulnerability assessments, and incident response mitigation.
- Monitored live network traffic metrics utilizing enterprise tools to isolate anomalous Active Directory and endpoint footprints.

Co-Founder **2024 - Present**

Jordan Cybersecurity Club (JCC) Platform - Jordan

- Co-established a collaborative network bridging academic curricula with real-world security sector competencies.
- Organized and hosted community-driven digital literacy workshops, local Capture the Flag (CTF) events, and secure coding bootcamps.
- Developed curricula and delivered hands-on instruction in Python scripting and basic cybersecurity foundations.

Undergraduate Teaching Assistant **2024 - 2026**

Tafila Technical University - Tafila, Jordan

- Coordinated alongside engineering faculty to deliver laboratory instruction, module guides, and academic grading rubrics.
- Facilitated labs for Operating Systems (Linux, shell scripting, process handling), AI, and Cryptographic Discrete Math.
- Provided personalized technical troubleshooting and network configuration mentorship to over 100 undergraduate students.

[Click He

TECHNICAL PROJECTS

Digital Forensics Insider Threat Investigation (FTK Imager & Autopsy)
- Conducted a mock threat investigation of a compromised endpoint to isolate evidence of data exfiltration.
- Acquired raw disk images with FTK Imager, analyzed Windows Registry hives, event logs, prefetch, and built an Autopsy timeline.

Secure E-Commerce Infrastructure Risk Analysis & Threat Modeling
- Performed a comprehensive security assessment and threat modeling (STRIDE) of a simulated web platform.
- Designed technical controls including secure DMZ network segmentation, WAF rules, and secure backup protocols.

EduKernel-Suite [GitHub Repository]
- Developed a virtual multi-image container laboratory designed for academic cybersecurity training scenarios.
- Configured network virtualization and container nodes (Docker) to simulate network attack and defense labs.

MHZ Tools 2.0 [GitHub Repository]
- Developed an all-in-one offline-first desktop application integrating EXIF metadata extraction, integrated C/C++ GCC Win32 compilation, PE binary entropy audits, and static document analysis.

Gravity Utilities [GitHub Repository]
- Developed a standalone Windows WebView2 desktop app that packages video downloading (yt-dlp), offline local Wi-Fi file-sharing portals, PDF compilation, and image compression tools.

MeasureDiff [Live Application] | [GitHub]
- Programmed a universal unit and measurement difference web application converting units across 10 major categories and computing absolute/percentage deltas and visual scales.

TECHNICAL SKILLS

Security Operations & Forensics
- Digital Forensics (Autopsy, FTK Imager)
- Threat Hunting & OSINT
- Wireshark & Nmap Network Audits
- Kali Linux & Metasploit Pentesting

Systems & Networking
- TCP/IP & Network Security Policies
- Linux Administration (Ubuntu, Manjaro)
- Windows Server & Active Directory
- Docker Virtualization & Containers

Programming & Tools
- Python (Security Scripts & Automation)
- Git & GitHub (Version Control & CI/CD)
- C++ Coding Foundations & IoT (ESP32)

Leadership & Instruction
- Technical Instruction & ToT Methods
- Workshop & Event Management
- Public Speaking & Presentation Skills

CERTIFICATIONS & LANGUAGES

Professional Certifications
- Claude Code in Action Certificate of Completion (Anthropic)
- Microsoft Certified: Cybersecurity Fundamentals
- Trainer of Trainers (ToT) Professional Certificate (TVSDC Jordan)
- Defensive Security & Threat Hunting Learning Paths (TryHackMe)
- Data Entry Professional Certification (EFE-Jordan)
- Advanced Computer Networking Specialist (Academic)
- Python Scripting for Information Security & Automation (Academic)

Languages
- English (Professional)
- Arabic (Native)
